REMARKS [redacted]			
[redacted]			

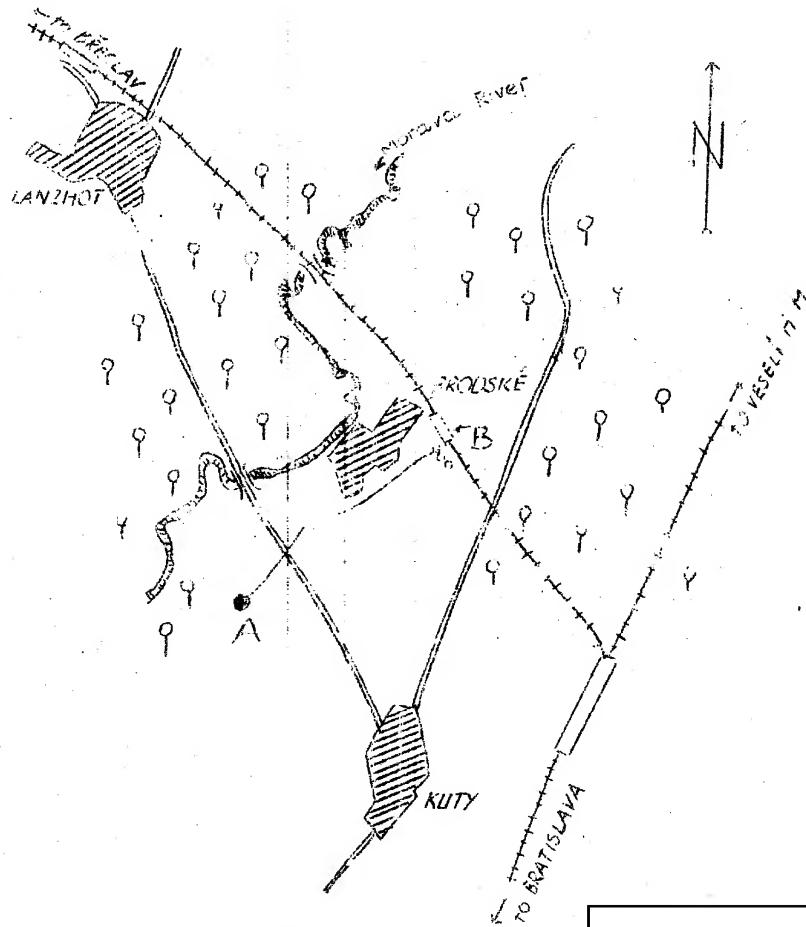

A new oil well was opened about 2 km southwest of Brodsko (P 49/3 85), on the edge of a forest. The oil well produced two to two and a half cisterns of oil daily, through its own natural pressure. The experimental drillings were started in June 1951. \*

25X1A \* [redacted] Comment. Information on the planned drillings near Brodsko was previously received. No information was known as to the size of the cisterns mentioned.
